

MS **Spectrumtm** **Mastitis Culture System**

A True Breakthrough in Mastitis Diagnosis

Each year Mastitis results in nearly 2 billion dollars in losses to the dairy industry. In just 24 hours, the advanced Spectrum MSTM Culture System can provide a presumptive identification for many of the major organisms responsible for this economically devastating disease.

- *Formulated with Spectrumtm chromogenic agars to produce uniquely pigmented colonies.*
- *Easily differentiate infectious agents based on color and colony morphology.*
- *Includes selective agar for Staphylococcus.*
- *Individually wrapped plates for extended shelf life.*
- *Color interpretation chart provided free with first order.*
