----------------------	---------------------------------	-------

An exceptional teaching tool, our fixed slide specimens include intestinal parasites, protozoa, hemoparasites, ectoparasites, and fungi. Our fixed parasite suspensions can be used to create challenging "wet" slide preparations resembling clinical samples ideal for testing. We use fresh, high burden specimens and inspect each slide prior to shipping. Should you require a specimen not listed please contact us for availability. Our inventory of specimens varies with availability; all species may not be available at all times; we may limit quantities for specimens in short supply.
